

THE WORLD OVER

YUKON TO BE LINK IN AIR MAIL

WINNIPEG—An important link in the proposed all-British round-the-world air system, the 957 mile stretch from Edmonton to Whitehorse, Yukon will be bridged July 5 when a passenger and airmail service is inaugurated. George Herring of Ottawa announced here Wednesday.

The weekly service will be started by a Canadian commercial flying company, United Air Transport of Edmonton, and will connect with the Pan-American route from Whitehorse to Nome, Alaska, on the Pacific coast.

AIRSHIP HINDENBURG CRASHES

LAKEHURST, N.J.—Her silver bulk shattered by a terrific explosion, the German air liner Hindenburg plunged in flames at the United States naval air station here Thursday night, May 6, with indications at least one-third of the 97 aboard perished.

The American Zeppelin Company, through its press representative Harry Bruno, placed the death toll at 35 of the 97 aboard.

The passengers, who were waving gallantly a minute before from the observation windows that slit the belly of the dirigible were so stunned they could not describe later what happened. Some jumped to the sandy landing field along with members of the crew. Others seemed to have been pitched from the cremating sky liner as it made its death plunge.

An explosion of the No. 2 gas cell toward the stern of the ship was named as the cause of the disaster by the State Aviation Commissioner Gill Robb Wilson, who called the blast "strange." The highly-inflammable hydrogen gas followed, the result of flame as the explosion plummeted the ship to the airfield. Ground spectators said the crew members, all the members of the ship "never had a chance" to escape.

The disaster struck without warning. The ship had sped her short way toward the moorings near the end of the landing lines had been snatched from her belly and the second crew had crossed the moorings from the nose when the explosion roared out scattering ground crew and spectators alike.

STOCK JUDGING CAMP FOR BOYS AT EXHIBITION

A Boys' Camp of instruction and judging of grain and livestock will be held this year at the exhibition with the annual Calgary Exhibition and Stampede. It was started today by E. I. Richardson, general manager.

The camp has been sponsored by the federal and provincial departments of agriculture, the University of Alberta and the Exhibition board. It will be open to boys 14 years of age or over, and under 21 years, at date of July 5th, 1937. Entries close June 16th.

JAS. GORDON ELECTED PRESIDENT OF GRAINGER BASEBALL ASSOCIATION

Grainger Girls Softball Team Also Organized

The Grainger Baseball Club held its annual meeting at the diamond last Sunday with Jas Gordon as chairman. The financial report showed a balance of approximately \$80 in the treasury.

The following officers were elected for the year:

President, Jas. Gordon.
Vice-President, F. Ward.
Sec.-Treas., A. VanOver.
Directors, T. Little, R. Little and W. Crawford.
Manager, Clifford Gordon.
Captain, Ted Remper.

The Grainger Girls Softball Club held their annual meeting last Sunday and the following officers were elected:

Manager, W. Crawford.
Coach, B. Ward.
Captain, Ellen Heffernan.
Any teams desiring to play softball are asked to communicate with W. Crawford, Grainger.

ALEXANDER REID PASSES AFTER A LONG ILLNESS

Death came suddenly on Saturday morning to Alexander Reid in a Calgary hospital. Deceased had been ill for almost two years, but he was not considered to be in a critical condition and he had been admitted to the hospital only a few days previous for treatment. His condition grew steadily worse and he passed away early Saturday morning.

"Sandy," as he was known by most people, was of a genial disposition and had a large number of friends in the town and district. He came to the district 34 years ago and took up farming. About eight years ago he moved into town and has conducted a dry business here ever since.

Deceased was born in Glasgow, Scotland, and was 46 years of age. He is survived by his wife, Margaret, and two daughters, Helena and Kathleen. His parents, Mr. and Mrs. Alex Reid Sr., Carbon; three brothers, William, of Carbon, Robert, of Healdsburg, and John, of Vancouver; two sons, George Wise, Calgary, and Mrs. Frank Skerry, Carbon.

Funeral services for the late Alexander Reid were held in Calgary on Tuesday, May 11th, at 2:00 p.m. in the funeral home of Messrs. A.F. McKibbin, Jas. Flanagan, S.J. Garrett, Len Foxon, P. Edwards and H.C. Wilson.

CARBON ENTERS TEAM IN BASEBALL LEAGUE FORMED ON THURSDAY

Local Merchants Donate Suits For Players

A district meeting was held in Three Hills last Thursday night for the purpose of organizing a baseball league. Carbon representatives, being Messrs. G. Edwards, W. G. Mathers and Percy Edwards.

Representatives were present from the clubs of Toronton, Three Hills, Huxley, Equity and Carbon and it was decided to organize a league to comprise the above mentioned clubs.

The following league officers were elected:

President, Joe Kary, Torrington.
Sec.-Treas., Frank Laven, Torrington.

Directors: The Presidents of each of the baseball clubs represented.

Secure Eleven Uniforms

President Mathers of the Carbon Club is mainly responsible for the obtaining of new uniforms for the Carbon boys this year. This week he interviewed eleven of the local business men and obtained eleven donations for uniforms. Donators are as follows, and each uniform will bear the inscription following the name of the business place:

Garrett Motors—Garrett Motors.
C. H. Nash—Buy at Nash's.
Jas Flaws—Carbon Smithy.
Builders Hardware Stores Ltd.—Builder's Hardware.
Farmers' Exchange—Farmers' Exchange.

Carbon Trading Co.—Carbon Trading Co.

Long May They Reign

The following poem by poet Laureate John Masfield, is fitting to commemorate the coronation of King George VI and Queen Elizabeth, which took place early Wednesday morning, May 12.

O God, the Ruler over earth and sea,
Grant us Thy guidance in the reign to be.
Grant that our King may make this ancient land
A realm of brothers, working hand and hand
To make the life of man a fairer thing:
God grant this living glory to the King.

Grant, to our Queen, the strength that lifts and shares
The daily burden that a monarch bears:
Grant to them both, Thy holy help to give
The homeless, hope, the worse, means to live;
The light to see, and skill to make us see
What ways are bad, what better ways may be;
And grace, to give to working minds and zest
To reach excellent things beyond their best.
Grant to them peace, and Thy divine peace.
The joy of making humankind to cease:
Make wise the councils of the men who sway
The Britains here, the Britains far away:
And grant us all, that every righteous will
In this beginning reign may be fulfilled.

—John Masfield

LONG YEARS AGO

May 22, 1924

The Carbon football team journeyed to Okney Wednesday afternoon and defeated the Okney eleven by a 2-1 score. The goals were scored by Geo. Wise and Len Foxon.

The re-organization meeting of the Carbon Golf Club was held in the Municipal office last Monday, and the following officers were elected:

Pres., J.O.A. Letourneau.
Vice-Pres., F.J. Besant.
Sec.-Treas., I. Foxon.
Executive Committee, Messrs. H. Jealous, Brucis and MacDonald.

A number of citizens of Carbon are entering their appreciation of the aesthetic by planting trees around their premises.

The dedication of Carbon Masonic Hall took place Tuesday evening, May 11th. The impressive ceremony was performed by M.W. Bro. S.J. Blair, P.G.M. of the Grand Lodge of Alberta, assisted by other Grand Lodges of Alberta. Visiting brothers were present from Drumheller, Rockyford, Arden, Three Hills, Trochu and other points.

McKibbin's Drug Store—McKibbin for Drugs.

Farmers' Exchange—Farmers' Exchange.

WEEKLY COMMENT ON THE WORLD OF WHEAT BY H. G. L. STRANGE

"To save the Prairie farmers from losing some sixty million dollars worth of wheat in rust years."

Such was the problem set for the Rust Research Laboratory which was established in Winnipeg with resolution and earnestness in 1925.

Well equipped, and well-staffed with competent scientists, plant pathologists, geneticists, plant breeders and statisticians, the Laboratory started to work with energy and vision. The nature of the rust spot itself was studied. It was found that the spores consisted of many families and strains which affected different varieties of wheat each to a greater or lesser degree.

Soon the barbers' in the west were eradicated, yet the rust spores still appeared. Now it was found these were air-borne, coming from the United States, perhaps from as far south as Mexico.

Finally, out of all the work, several new varieties of rust-resistant wheats were developed. They are still being tested for milling and baking qualities, yield, stiffness of straw, earliness and resistance to plant diseases. It is hoped, too, they will be resistant

to all known forms of rust.

One new variety, known as been licensed and released for use. This year at hundreds of points it is being tested by farmers against Thatcher and Apex.

Factors which have tended to raise price:

Broomfall increases estimated importers' requirements. More rain needed in Southern Hemisphere. Small wheat crop expected in Spain. Heavy rain and high temperature causes rank growth in the Yangtze Valley (China). Decided decrease in Argentine shipments. Export below average wheat and barley production in Iraq.

Factors which have tended to lower price:

Further rains in the United States of America. Indian wheat estimate 30 million bushels above last year. U.S. price estimate spring wheat average increased two million acres. U.S. winter wheat estimates high. Some wheat crop expected in Argentina. Increase in 1936 production German crops.

A Cereal Treat for the Farmer

Spread as if for a banquet, a table in the exhibition hall at the Central Experimental Farm played the curious of the crowd when, in April, the staff of this institution played host to the Ottawa Valley Seed Growers Association. It might have been a breakfast table, for the dishes contained cereal seeds of all kinds, each in proper proportion to the milling thereof, some of whom seemed to forget their table manners, were seen to be reposing on a jelly that covered the bottom of each circular glass dish. There were rows and rows of these dishes containing sprouting grains of barley, oats, wheat, corn, as well as of beans and peas. The dishes were arranged in paired rows, and it was observed that in the first row of each the seeds had sent out strong, healthy shoots, and that nearly all of them which germinated were translucent and clean, a really tempting dish. But the seeds in the other rows of dishes had germinated weakly and were surrounded by masses of dirty black and brown fungus growth which is responsible for the diseases known as root and stem rots of plants.

Seed Treatment Succeeds

"What makes the difference between the two?" inquired one whose interest had been absorbed by the objects on the table, and his attention was directed to the placards above, which informed him the only difference was that one lot of seed had been treated with an organic mercury dust that not only controls smut of cereals but promotes germination and destroys the spores of root rot on seeds of all kinds. The contaminated seeds had been treated as a precaution, but had been absorbed by the healthy ones, were untreated. He learned, further, that some of the seed used in the tests was from elite and registered stock and shuddered to think that, despite its outwardly respectable appearance, the grain for which he had been awarded a prize at the fair might be harbouring the vile spores of root rot. He was so impressed by the evidence on the table that he vowed there and then to take no risks and treat his seed grain this year with the organic mercury dust. He considered the cost negligible, only three cents for the half-cush of the disinfectant required per bushel of seed.

"I've got to scrub out the toilet bowl and how I hate it."
"Better use GILLET'S LYE and flush out the stains."

No need to rub and scrub

Use Gillett's Pure Lye once a week... it takes off yellow stains in a jiffy... keeps clogged drains running freely... banishes unpleasant odors. Use Gillett's Lye in solution for all kinds of heavy cleaning tasks. It just washes dirt away. Saves you hours of hard work. Always keep a tin handy.

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet tells how to use this powerful cleanser for dozens of tasks. Send for free copy to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER
By arrangement with Thomas Allen, Publisher, Toronto

CHAPTER IV—Continued

The next spring William Marshall was 21, and his father set him up in life after the fashion of the times. For livestock, he received with his father's blessing a yoke of young oxen, a heifer, due to calve later, and an elegant pair of small pigs. His farming equipment consisted of a wagon and its contents. There were a few bags of seed spring wheat and oats, some millet and seed potatoes. For tools he had, among other things, a crosscut saw, a rip saw, an auger, two cant hooks, logging chains, a cradle, and a keg of ironmonger's supplies. Early in the spring, his brother Maxwell went over with him, and the boys put in the first season's crop on the Marshall place. The cattle found good pickings in an old heaver meadow.

The large flocks of fallen trees were as dry as tinder. The lads made ready for the burning. Brush fire piles were laid in a hundred places and flaming torches of dry cedar passed quickly through the fallow. Within half an hour the entire field was a roaring mass of crackling flames shooting up to the sky in sparkling cones of fire. Great clouds of whirling black smoke rose to drift in clouds over the valley for miles around. The heat was intense. Flames lit up the sky throughout the night and for days afterward the fire growled and thundered in the great hardwood logs as it reduced them to powdery ashes.

Then the dirty work of making land began. The field was an ash pit with stumps sticking up in all directions and was littered with half-burned logs and charred debris of the fire. The stumps could wait for a more convenient season. Scattered logs and great, cranky limbs were yanked into fresh piles, with much prodding of the rumps of the oxen, and the burnings were then prepared for a fresh burning. Slight sweat stank on the young lads, who fought amid choking dust for every foot of farm land.

THE FAMOUS RUBBING LINIMENT

Rub on—pain gone. Get the new large size. Also available in smaller, regular size.

MINARD'S RUBBING LINIMENT

and be as timid and bashful about her love as any innocent, sweet country maid.

Romantic love had little to do with human match-making until a very recent date; and, even to-day, it seems to be, in the main, a home-smashing infection that catches idle men and silly women after they drift into the dangerous area of the forties. Farm has always married farm among the thirty rural classes in Europe—and the lad and the lass are thrown in with the cards. Bonds and mortgages marry mortgagees and bonds among the town-dwellers; and the poor have always been lazy and listless in looking for their mates. Marrying love is distressingly mercenary among the Irish on the old sod. Unless she has a couple of Kerry cows for the dowry the emotional Celt demands that his bride be strong in back and legs for the carrying of the creels of turf. And after the songs are sung and the speeches made, something more enduring than love sickness is required to keep a home fire burning brightly in cabin or hall. Love of man and wife is a more sturdy plant. It is a cherishing, unselfish affection that pities, is long suffering—and forgives. To make a happy domestic climate for wifes and wife, that's the true pathos and sublime of human life.

The matter of finding a suitable wife for William became the subject of a lengthy and frank discussion between the young man and his parents. The matter was canvassed most diligently in the evenings, in that drawy undertone in which folk who live close to the ground, and after the others have gone to bed. Marriages may be made in heaven, but little sense usually requires the services of kindly matchmakers, who discreetly steer the young man's fancy in a direction where a suitable girl is quietly waiting for the likes of him. Now, setting up house-keeping on a bush farm requires more than the cabin and a bundle. There is also the bed and bedding and the kitchen and other household gear. The right sort of a father-in-law gives his daughter on her going-out from home. Local prospects were canvassed carefully, but with little success. The Marshall getting far in solving William's problem for him. Before he went out to work in service the lad had been too young to be on courting bent. Moreover, he had since been converted, and after trial had joined the Methodist Connection. It was at a camp meeting at Hog's Hollow, in a season of great power and glory, that he had been brought under the awakening of the spirit, and having been the subject of saving grace.

(To Be Continued)

Universe Not Expanding

Light Rays Coming From Distant Stars Get Tired And Quit

Light rays coming from distant stars get tired and quit, say astronomers here. Dr. Arthur H. Eddington of the University of Notre Dame, Belgium. Addressing the American Physical Society, Dr. Eddington declared that this property of light meant that the universe is not expanding, as astronomers and physicists believe, but remains quite constant. Dr. Hae declared the light should be "photons" or particles of light, grow more and more tired until it eventually vanishes.

What He Didn't Know

A gentleman in a bus was annoyed by the attentions of a fellow-passenger, who had been drinking, and was imparting various scraps of information in a dogmatic and aggressive manner.

Finally the gentleman said, "I am not interested in your information, unless you could tell me something I don't know."

"Or I said," said the other, "I'll tell you something you don't know. My sister was a washerwoman, and I'm wearing one of your shirts."

The British yard originally was defined as the length of the arm of King Henry I. by royal decree.

"You say you sang at the Metropolitan Opera? What was the aria?" "Ten thousand square feet."

WHAT EVERY WOMAN SHOULD KNOW!

No man or girl is to suffer every month from the troubles of menstruation, headache or nervousness, due to functional disorders of the reproductive system. Favorite Prescription is a very beneficial remedy. It is what Mrs. Ada Dyer of 217 Front St., St. Louis, Mo., told a P.M. on a newspaper. "I suffered every month from pain on my side and was a washed-out wreck. I began, as a last resort, taking Dr. Pierce's Favorite Prescription. It cured me. I have now one of your neighborhood druggists, who sell tablets, the Liquid at 50c and 25c."

WARNING YOUR LAST CHANCE

This is the final Contest in the series of three Royal Household Flour "Name the Picture" Contests! Closing Date: June 12th. Your entry must be post-marked not later than that date. Send your entry now.

This is what you do:

This contest is looking for a name. Suggest any name you like, and the picture will be your own. The name will be chosen by a committee of judges. The name will be chosen by a committee of judges. The name will be chosen by a committee of judges.

BE SURE TO TRY Royal Household Flour "Name the Picture" Contest

3 BIG CONTESTS 259 Cash Prizes

First Prize \$100.00
Second Prize \$50.00
Third Prize \$25.00
5 Prizes of \$5.00 each
75 Prizes of \$2.50 each
GRAND PRIZE \$250.00

RETAILERS: Each dealer named by the contest will receive three first prize prizes and the sum of \$10.00.

ROYAL HOUSEHOLD FLOUR

\$1330.00 IN CASH PRIZES

Follow these simple rules:

1. Write your name on the coupon form on a separate sheet of paper with your name and address and that of your dealer.
2. Write each time you send the coupon form a new name, and the name of the dealer as indicated on the coupon form.
3. You may send as many different names as you like, but each name must be accompanied by a recent photograph of the dealer as indicated on the coupon form.
4. This contest will close June 12, 1931. All entries must be post-marked not later than that date.
5. Address your suggestions to: Royal Household Flour Co., Limited, and send it to the nearest dealer as listed.
6. The names are given to the Royal Household Flour Co., Limited, and the names are given to the Royal Household Flour Co., Limited.

ROYAL HOUSEHOLD FLOUR

Little Helps For This Week

Blessed be the God and Father of our Lord Jesus Christ who hath blessed us with all spiritual blessings, Ephesians 1:3.

Son, murmure, if thy sky is clear, And wholly bright to view, And some small speck of dark appear In their great heaven of blue; And scene with thankful love be filled, If but one streak of light One ray of God's great mercy The darkness of their night.

The elements of happiness in this present life no man can command, even if he could command himself, for they depend on the action of many wills, the partnership of many hearts. By the highest law of God the holiest must ever bear the sin and sorrow of the rest; and the blessedness of his own spirit's happiness needs have no control, for God has given unlimited power to every man to preserve his own happiness although there is in him something higher than that. He can do with out happiness and hatred and blessedness.

Closely Resembles Linen

Paper Made From Wood Fibre Suitable For Clothing

Paper clothes, woven of yarn spun under water from wood fibre, soon may compete with linen fabric. The new yarn proved in tests to be stronger wet than dry and neither stretched nor shrank with laundering or dry cleaning, according to a bulletin of Arthur D. Little, Inc., industrial chemists, Boston.

In appearance it most closely approximates linen, and the property has been a principal factor in present uses in coverings, handbags and the newer sports suits. Continued improvement may make the paper product a significant addition to the present range of textile fibres. It is believed.

The fibres are less than three-hundredths of an inch long, as compared with an inch long, and woven into an inch long, and woven into an inch long, and woven into an inch long.

Manufacturing On Prairies

Manufacturing in the three prairie provinces had an output of \$238,000,000 during 1928, and gave employment to 200,000 persons. John East, chairman of the prairie division of the Canadian Manufacturers' Association, told members at the annual meeting in Saskatoon.

The first English pipes were made of clay. These have been manufactured for 350 years.

The great contest of 1811 was larger than the sum.

The only truly dignified person is the person who doesn't know he is.

Miss Pearl Woodford, who has been visiting with her aunt, Mrs. Jennie Ramsey, returned to Calgary on Saturday.

WANTED—Position as housekeeper for man or men, by middle-aged woman. Will go anywhere. References if desired. Apply to Box 724, Carbon Chronicle.

The Lady Roberts Chapter I.O.O.F. held a successful Coronation tea last Saturday. The tables were decorated to represent England, Ireland, Scotland, Canada, India, New Zealand, Australia and South Africa.

Mrs. J. H. Olliphant, Myrtle and Bill returned to Calgary on Saturday.

Mr. and Mrs. R.J. Garrett were Drumheller visitors Saturday morning.

Some of the new grain received a setback in the district this week when it was off close to the ground by the severe dust storms which have been prevalent. We are in need of rain if soft drifting is to be curtailed.

ELEVATORS TO CLOSE

All grain elevators in Carbon will observe the weekly Wednesday half-holidays, and will close their doors at 1:00 p.m. from now until harvest.

BANK OF MONTREAL
REGULAR CROP REPORT

General—Wheat seeding is now well under way in the prairie provinces although it was retarded by wet weather in Manitoba and northern Saskatchewan. Surface moisture, generally, is adequate for germination, but owing to deficiency in subsoil reserves rains are urgently required, particularly in southern and central Saskatchewan and eastern Alberta, where there has been very little rain so far this spring. In Quebec Province the season is late and field operations are not as far advanced as usual. The maple-syrup crop generally was above average in quality but the run was small. In Ontario field operations are about two weeks late. Fall wheat wintered satisfactorily and old alfalfa and alfalfa are in excellent condition. In the Maritime Provinces seeding will not be general before another two weeks.

WHAT FOLKS WANT
IN THEIR PREACHER

There is a story going the rounds about a small congregation of a church, hunting for a new minister. The board members were perplexed and they sought the aid of the chief executives of the church, who happened to be in their city on official business.

The executive met the board and they told him what they had in mind. One man suggested they needed a great orator and pastor; another said the man they wanted would have to be a genius for organization; another put in that they needed someone with an eye to business; another intimated that they would require a good politician to keep the various factions in mind; another wanted someone with athletic ability to coach the young.

The church executive listened attentively, and said: "Well, gentlemen, all you want is a cross between Rev. Dr. Pigeon, Sir Edward Beatty, Hon. Charles Dunning, Premier Hapburn and Lionel Conacher and you want to get him for \$100 per month; I tell you it can't be done."

RUSH HIGHWAY LINKS TO
WIN TOURIST TRADE

Road improvements elsewhere are always of interest to Alberta motorists, but this is especially the case in regard to British Columbia.

That great vacation land, always an alluring part of the Dominion's holiday spots, has long had a strong appeal to motorists from this and other provinces.

What is British Columbia doing to link up her highway system with Alberta? This is a question uppermost in most minds.

A recent announcement from the coast province shows that the B.C. authorities are moving along that line. Their 1937 program provides for hard surfacing of 280 miles of roads, which when completed will give the province

1200 miles of that type of surfacing. It is claimed that by 1940 there will be a hard-surfaced road from B.C. to the Alberta boundary, as the Big Bend section of the Trans-Canada will then have been completed.

When the 1937 program is completed, all but 70 miles of the highway from Vancouver to Kamloops will be hard surfaced.

British Columbia is demonstrating its realization of the value of hard surfaced highways to develop the tourist trade, something which has long been urged on both provincial and dominion governments by the Alberta Motor Association.

The way to bring big cash business here, something that will yield larger profits than grain growing or anything else, is hard surfaced roads that will attract tourists.

Economical Housewives

There was a day when the housewives bought the faraway "bargain" in the belief that it was good business to save a few pennies. But experience taught them a few things. Today's housewives do not buy blindly. They examine the article first and when satisfied with the product they pay a fair price at home. It is economical to make your purchases in

CARBON

SOCIAL security is today available to YOU—and to every man and woman, young or old, rich or poor—through savings in Life Insurance.

In fact, Life Insurance offers you a triple measure of social security—protection for your wife and children in the event of your death—a cash reserve to tide you over emergencies—and financial independence for your own old age.

No other plan of social security can give you such complete peace of mind. And only Life Insurance enables you to create an immediate estate with modest savings.

Today Three and a Half Million thrifty Canadians are banded together for mutual protection through Life Insurance. Ninety-three per cent. of these policyholders are insured for amounts of from \$500 to \$5,000.

To you and your family, Life Insurance offers the finest form of savings and security.
